**to live for**

# vikki smyth

As a lover of good food, great wine and stimulating conversation, it is only fitting that my business reflect these obsessions. As an admirer of design and individual style, it is only natural that my work embody these qualities. And, most importantly, as a great fan of life itself, well, let's just say my passion is to create things "to live for."

Through the interplay of unconventional shapes and brilliant colors, I aspire to transcend the predictable mainstream into a realm of elevated beauty, sophistication, and connection through my innovative tabletop and luminary designs.

You will discover that my designs are your partners and are created especially for you and YOUR life's inspirations.
